

Drawn Tubing

Electro-Glass Products offers fine quality "Drawn Tubing" maintaining precision accuracy from lot-to-lot.

Glasses Available

Electro-Glass Products is presently producing tubing from 2164, Kimble Certified EN-1 and IN-3. Other glasses available are "S-8061 Substitutes", R-6, Corning 7070, Oxi-Glass and N-51A. These glasses are available in Clear, Blue and Green. Other colors can be manufactured by special request.

Sizes

Our present capability in sizes range from as small as .016 O.D. with an .008 I.D. to as large as .125 O.D. with an .024 I.D. Other sizes will be considered on an individual basis.

Solid Rods

Our present experience in solid rods has been from an O.D. of .078 to .125. But other sizes are always a consideration.

Engineering and Development

The above material, colors and sizes have been successfully produced. **Electro-Glass Products** is always interested in working with its customers in the development of new sizes, colors and materials. Feel free to call and speak with our engineering or sales departments about your needs.

Confidentiality is always guaranteed.
